MARIBOJOC III

SOFTWARE DEVELOPER

ABOUT MYSELF

I am Oscar T. Maribojoc III, a software developer with a deep interest in solving complex technical problems. My skills span design thinking, backend development, mobile app creation, and machine learning. I am passionate about coding, technology, and using my knowledge to make a positive impact. I am continually learning and growing, eager to contribute to exciting new projects.

PROJECTS

Seat Reservation System (C# .NET WinForms)

- A desktop application for booking seats at events like concerts and cinemas.
- Allows attendees to select available seats in real time.
- Includes an admin panel to manage bookings and view attendees by event and date.
- Supports exporting data to spreadsheets for reporting and tracking.

Memory Game Application

- A simple interactive memory game where users match pairs of cards.
- Built with Flutter for cross-platform compatibility.
- Designed to improve memory and concentration through fun challenges.
